

The Russian Doll

I think the most interesting story I've read recently is how our former directors of the CIA are referring to the Donald as a "Russian Doll". It seems that the former directors, both of whom worked for Republican presidents, think that the Donald's desperate need for flattery made him susceptible to being turned by Putin. Putin, who the directors point out never left the KGB, would be adept at exploiting the vanity of a megalomaniac. Fascinating stuff if the future of the world didn't hang in the balance.
