

John Lewis For Speaker

Absolutely amazing that a seventy-four year old man is still leading the charge for doing what's right in America.

Of course, I'm talking about Georgia Congressman, John Lewis. Lewis had the courage to do the right thing for the innocent lives taken in the Orlando shooting. He called for a sit in, exposing the Republicans for the puppets of the gun industry that they are.

Is the term "puppets" too harsh? I don't think so, not when ninety percent of the American public wants stronger gun laws. Who do the Republicans they think they are serving by not doing the will of the people? Are they protecting us from ourselves?

Good on John Lewis for calling bull scat on the Republican shenanigans.
