

The British Donald

I guess we will all remember this summer as the one when truth went on vacation and hyperbole came to stay.

From the Melania deniers, to the other stalwarts of the Republican party that promote the meme that we are living in the end of times, and that only a Trump presidency can save us, to Trump's brother from another mother, Boris Johnson, who is now being crushed by the reality of what Brexit really means, the chickens are coming home to roost.

Of course, they are the biggest, fattest, best tasting chickens ever. Just ask me.
